

10 January, 2022

Millésime Bio is postponed because of Covid

New date is 28 February to 2 March 2022

The Millésime Bio in Montpellier, the world's leading trade fair for organic and biodynamic wines, will be postponed from the end of January to 28 February to 2 March 2022. The digital part of the trade fair, which was planned as a hybrid event, will now only take place on 24 and 25 January.

The reason given by the organisers is the tense covid situation in France with very high incidence figures of around 2.000. The decision was made after intensive discussions with exhibitors and visitors. Of them, the majority was clearly in favour of a postponement.
